

BRENT WHEELS & EQUIPMENT 3

MODEL 16

The ideal wheel for use in any rehabilitation program. This wheel is a variable speed power wheel like the model B, but the frame has been modified for people with special needs. Possibilities include use with a wheel chair, a standard stool, or while standing up. A crank mechanism adjusts the height of the 12" cast aluminum throwing head from 19 1/2 inches to 34 inches. The wheel head speed is operated by hand or foot. Splash pan included.

PRICE \$2,695.00

MODEL J

Our steel frame kick wheel with a 14 inch wheel head, designed both for form and function. The flywheel is a full 135 pounds of concrete with steel reinforcing, rough on top near the 1 inch shaft for kicking, and smooth near the rim for braking. The shaft is supported by high quality ball bearings with cast iron housings. The seat can be adjusted to fit any potter. A motor kit is available to convert the J to an EJ. Smoothly curved rigid steel frames, solid concrete flywheels, and first quality ball bearing precision in cast iron housings make the model J a very dependable kick wheel. The relationship of the head, seat, flywheel and foot rests is carefully designed for the most comfortable seating position about the same as on power wheels so that you can rest your elbows on your knees when throwing, and get maximum power when you kick. A FREE Splash Pan and Plasti-Bat come with the J model!

PRICE \$1,549.00 Motor Kit \$895.00

MODEL EJ

Combines the quiet strength and control of a steel frame kick wheel with the power of a 1/3 hp AC motor attachment. The motor drives through a small steel driving wheel to a 9 inch diameter solid rubber wheel and is engaged by a foot lever. We designed our motor switch so it shuts the motor off every time you release the foot lever. The head is 14 inches. FREE Splash Pan and Plasti-Bat come with the EJ model!

PRICE \$2,495.00 With Motor Kit \$2,595.00

KICK WHEEL WOOD KIT

This kit, together with the separate metal parts kit described below, contains everything you need to build the kick wheel shown above. The Kick Wheel Wood Kit contains all the wood pieces, pre-cut and ready for assembly. The unique frame design uses a 1/2" exterior plywood stressed skin, which is as rigid as most steel designs. To complete the wheel, all you will need is a drill, hammer, nails, glue, and bricks.

PRICE \$255.00

KICK WHEEL (METAL PARTS KIT)

The metal parts kit includes a 12-inch aluminum head (14" head optional), high quality cast iron mounted ball bearings, flywheel flanges, nuts and bolts and illustrated instructions on the construction of your own "do-it-yourself" plywood frame kick wheel. Or, purchase the Metal Parts Kit with the Kick Wheel Wood Kit listed above to complete your wheel.
